

Electric transport?

You're doing great...

You're in charge

You value a healthy living environment. Electric transport is therefore evident for you. Responsible electric charging is part of that. That is why you set the highest demands on your charger in terms of safety, technology and convenience.

A smooth charging solution that gives you the peace of mind that everything is perfectly arranged. And which is also easy to install, operate and maintain. You do it your way. You choose Ecotap. You're in charge.

ecotap[®]

Safety first

Electric driving means cleaner and more economical driving. Responsible driving also requires the highest safety requirements. Ecotap® sets the standard in this regard and is at the forefront of innovation. The same applies to the certified installer of the charging solutions. They therefore ensure the perfect placement. As a result, you are assured of carefree charging convenience. A pleasant certainty.

Enjoy comfortably

The intuitive operation of our chargers ensures that everything is smooth and simple. They are also manufactured in such a way that they require a minimum of service and maintenance. That means you can enjoy extremely comfortably with an Ecotap® charger. Charge up... and hit the road. It can be that simple.

24/7 Ecotap support

At Ecotap® we do the maximum to make it easy for you. So if you have a question about electric charging, we will be happy to help you on your way. This can be done via your dealer/installer, the information on our website, a chat and certainly also via our helpdesk.

For your convenience, the helpdesk is even available 24/7.

- ✓ Highest requirements according to CSR People, Planet & Profit
- ✓ Easy power consumption and billing management

Healthy living environment?

Pleasant life starts with a healthy living environment for everyone. It requires a concerted effort from all of us. There are opportunities and challenges for this. You have decided to seize those opportunities. You choose to contribute to the climate. No more particulate emissions. Saving fuel.

Cleaner transportation.

You Ecotap, because you like to make a difference.

You're the difference...

Home convenience

Ecotap® offers a convenient and fast charging solution at home, at work, on the road... just where you want it.

For every electric and plug-in vehicle. If you opt for home charging, you can choose from the Homebox with cable (possibly with a stand) and the Homebox with socket (with a 7-pin socket and optionally available stand). Both are made of attractive and durable steel. So you never go wrong. After all, with Ecotap® you are in charge...

With or without charge card?

To use a charging facility elsewhere, it is often important that you have a charging card, with or without registration.

Together special

Also good to know... At Ecotap® we believe in an inclusive society. Everyone has talent, everyone is special and everyone participates. By empowering people, unprecedented amounts can be achieved. Together we make Ecotap® special. This is special for you, because we keep focus on your interests: getting everything possible out of your charge point.

Home chargers for carefree use

Homebox with cable

This home charger is user-friendly and equipped with a flexible charging cable (up to 11kW) or smooth cable (up to 22kW) with plug type 1 or 2 that can be connected directly to your electric car. Manufactured from 2mm steel. The Homebox can be mounted on the wall or on a steel upright (optional).

Versions:

- ✓ With push button
- ✓ With charge card + registration
- ✓ With charge card without registration

HOME CHARGERS

Homebox with socket

This home charger is user-friendly and equipped with a 7-pin socket (Type 2). You can connect your electric car to the charging point via a charging cable. Manufactured from 2mm steel. The Homebox can be mounted on the wall or on a steel upright (optional).

Versions:

- ✓ With push button
- ✓ With charge card + registration
- ✓ With charge card without registration

Smooth charging solution?

It has certainly not escaped your notice: the number of electric drivers is increasing rapidly. It is therefore logical that you also need to select one or more charging solutions for the company. An ideal, smooth charging solution for team members and visitors. Moreover, a solution that is self-explanatory in terms of ease of use. And not unimportant: aesthetically executed, possibly even in your own house style. Fast, good and affordable charging can also be very personal.

You're succeeding...

Nothing but benefits

You only have advantages as soon as you decide to install one or more charging points. To start with, you directly contribute to a better environment. In addition, you reap the appreciation of the visitors, who can use the visit to restore the volume of electricity in their vehicle. And, not unimportant, after a few years you have earned back your investment and you can generate extra income yourself. Everyone wins with electric charging.

Need a permit?

Nothing stands in the way of realizing a charging solution on site if it is installed on your own land. We realize your charge points based on your wishes and expectations, such as the intended capacity.

The right choice

On www.ecotap.nl you will be quickly guided through the possibilities. Your installer can also tell you all about it. If you wish, you can receive further information by telephone, e-mail or chat. Ecotap® is happy to contribute to your success.

Small business

Small, medium or large... Ecotap® offers a suitable charging solution for every situation. From fast chargers to duo chargers; the ideal charger is ready for you. And always maintenance-friendly!

Large business

If you want a charging solution for multiple team members and/or regular visitors, then tailor-made advice may be advisable. For example about the implementation in your house style. Everything is possible at Ecotap®.

Logistics

With fast chargers specially designed for extensive use, Ecotap® distinguishes itself in the market. Balanced loading for heavy vehicles is one of the facets that Ecotap® has developed for the logistics sector.

Public transport

It is very important for public transport operators to create a reliable and efficient charging infrastructure. One that performs its function for a long time, easily and without problems. With Ecotap® you succeed completely in this.

Gasstations

Ecotap® fast chargers offer gas station operators an effective and accessible introduction to the world of electric cars. The chargers are very future-proof and easy to scale up and expand.

Public charging stations

Ecotap® offers the perfect charging solution for every situation. With public charging stations, for example, it concerns sufficient capacity, smart charging, userfriendliness and vandalism resistance. Ecotap® is known for this!

Duo chargers for business use

Duo

Beautifully designed charging stations that are ideal for placement at companies and in public spaces. The Duo charger is available in several versions.

DUO CHARGERS

Duo Wide

The Duo Wide charging point is suitable to be connected directly onto the operator's network.

Two cars can be charged at the same time

Wallcharger Duo

This charging station is ideally suited for wall mounting.

Two cars can be charged at the same time

On the road again with fast chargers

DC30

The Ecotap® DC30 is applicable for all electric vehicles and has a DC power output of 30kW. The actual charging capacity is determined by the vehicle and the fused Amperage.

DC60

The Ecotap® DC60 fast charger can be used universally for all electric vehicles with a CHAdeMo or CCS connection. This fast charger has a DC power output of up to 60kW. The actual charging capacity is determined by the vehicle and the fused Amperage.

FAST CHARGERS

DC120

The Ecotap® DC 120 fast charger can be used for all electric vehicles with a CCS connection. The charger has a DC power output of maximum 120kW. The actual charging capacity depends on the power available, maximum 180 amps needed (adjustable from 10A to 180A).

DC 150/180

These fast chargers can be used for all electric vehicles with a CHAdeMO or CCS connection.

DC150

The charger has a DC power output of maximum 150kW @CCS or 60kW @CHAdeMO.

DC180

The charger has a DC power output of maximum 180kW @CCS or 60kW @CHAdeMO.

The actual charging capacity depends on the car and the fused Amperage.
